

**OUR APRIL-MAY NEWSLETTER
AS OF APRIL 30, 2021**

WELL . . . Here we go again - now in WAVE 3, yet not the waves that we like – the ones out on the water!

The province has restricted many - your marina included. Marinas are being withheld by law in how they can conduct business. Whether we agree or disagree it's the law and we respect ALL who are trying to get through this, just like the rest of us. We are busy prepping your boats and getting ready for the time we can release.

SUMMER KICK-OFF: As of today, the Port Carmen Marina will not be holding our Summer get-together again this year. Need we say anymore? No public gatherings . . .

STARCRAFT BOATS UPDATE: In our first year of course!!!!!! Along with Covid and the shortage of near everything nowadays the storm that hit Texas this past winter has affected many industries including boat manufacturing causing added delivery delays. We should receive our first order hopefully soon with some of our pre-ordered boats, however other deliveries will be delayed until late into the season.

If you are thinking of a new pontoon or aluminum fishing/utility boat now is a good time to prepare an order for delivery prior to the 2022 season. Drop by to see Brad or Dave and see if you can build that dream of cruising in the sunset "On the Lake" or maybe get out and spend that time relaxing with a line in the water.

Have a look on our website to see the full line of boats coming to PCM. Here is the link www.portcarmenmarina.com. While you are on the site have a look at our webcam and check out our wonderful weather and warmer temperatures. Great for boating and all water sports!

**On the
Water
Designs**

DOCKS By: ON THE WATER DESIGNS:

The first delivery of docks should arrive as early as Monday May 3rd (although most are already sold) with more deliveries to come in the near future. The rising cost of material and availability on docks has created an unprecedented situation in docks this year. Drop by to see Brad or Dave or have a look on the website to view the lineup and pick your your favourite.

BOAT AND UTILITY TRAILERS are on the way (fingers crossed)

- **SHORELAND'R** boat trailers
- **SPORT HAVEN** utility trailers

We will "ONLY" receive what has been ordered now until next year due to their shortages. Again, come in and talk to Brad or Dave or check out our website to see the full lineup.

BOY SCOUT'S DOCK: This year we have taken on the very important task of assisting with the local Boy Scout's property in Green Bay on Lake Cecebe. This is an ALL-IN effort to get the kids out of the concrete and into the environment.

Port Carmen has rebuilt an 8 x 20 floating dock for the camp complete with rub rails, cleats and a fold-up ladder. This dock was achieved with the efforts and time of many people - the "Team" at Port Carmen Marina; the generous support of Magnetawan Home Hardware and the help from one of our main suppliers - Hutchings Marine.

We are working with another great youth supporter from *On The Water Designs* for their expertise to achieve the dock completion of securing the dock to the shoreline and attach it to the floater. This latter part is the only outstanding expense to the Green Bay Scout Camp. If anyone would consider a donation to help cover part or all of the cost, please contact the Green Bay Scouts treasurer - Cathy Snell, 315 South Horn Lake Road, Burks Falls ON P0A 1C0. Every little bit helps to get the Scouts into the country and onto Lake Cecebe!

Below is a photo of the completed 8x20 floater prepared by Port Carmen Marina "team" with the fantastic support of:

- The MAGNETAWAN HOME HARDWARE
- HUTCHINGS MARINE
- ON THE WATER DESIGNS
- And all of you who help support The Green Bay Scout Camp

Please remember safety first and courtesy to others and their property when on the lake.

We all look forward to seeing you soon. Stay safe, kind, and above all – healthy!

The Port Carmen "Team" – Brad, Dave, Kyle, Jim and Kate
